

STOP SCREENSHOT SCAMS

Two Goals

1. Stop the IG Screenshot Scam
2. Promote good security overall

IG Screenshot Scam

The Attacker:

1. Compromises an account and thus has access to a list of followers.
2. Identifies a Target account on that list, with many followers.
3. Has the Target username from the public information, but not the password
4. Sends the “I’m going to send you a link, please send me back a screenshot.” message, which appears to come from a trusted source.
5. Attempts login as the Target and tells IG the password was forgotten. This triggers IG to send a “reset link” to the Target, who screenshots it and sends to Attacker.
6. Receives screenshot of this link, uses link, and now owns the account.
7. Extorts money from the Target. Uses the Target’s follower list and proceeds to repeat this process.

Pretty good but I'm currently in the
